1 Quick Overview

1.1 Commands for inline text

Ш|₩-

Unicode codepoint			
U+10380	>>		
\ugtransuc {U+10	0380} → ▶		

Items may be accessed via the Unicode codepoint (in hexadecimal format). The command assumes that **\ugfont** has been defined.

Short command: $\setminus uguc \{U+10380\} \mapsto \blacktriangleright \blacksquare$. See §2 for a list of Unicode codepoints.

Unicode name			
alpa	>		
\ugtransun {alpa} → ➤			

Items may be accessed via a shortened form of the Unicode name. The command assumes that **\ugfont** has been defined.

Short command: $\bigcup \{alpa\} \mapsto \cdots$. See §3 for a list of Unicode names.

Items may be accessed by typing arbitrarily-defined shortcuts from the keyboard.

The default shortcuts are based on the Latin qwerty keyboard. The command assumes that **\ugfont** has been defined.

Short command: $\setminus ugts \{a\} \mapsto \longrightarrow$.

See §4 for the default list of typing shortcuts.

TS-to-ST

a.
$$^{\prime}a$$

(4)

\text{\ugtranstsst \{a.\} \rightarrow \^{\alpha}}

Typing shortcuts, delimited with a dot (.) when needing to disambiguate, can produce scholarly (standard) transliteration: dlt 'ugrt s₂ss.

Short command: $\ugst {ashgh} \mapsto `a\check{s}\dot{g}$.

See §5 for the list of transliterations.

1.1.1 Inline Styles

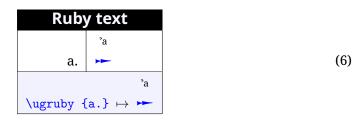

Various inline styles are available: word + transliteration; ruby text; glosses.

word (trans)

a.
$$\rightarrow$$
 (°a)

\ugw {a.} \rightarrow (°a)

(5)

(8)

(9)

(10)

Glossing: (dlt, 'royal palace guard post')

Gloss
$$\text{(7)}$$

$$\text{(1)}$$

$$\text{(2)}$$

1.2 Environments

The corresponding environments have an **e** at the end of their name.

Unicode codepoint environment: ugtransuce

\begin{ugtransuce}
U+10380
\end{ugtransuce}

Unicode name environment: ugtransune

\begin{ugtransune}
beta gamla

delta lamda to
\end{ugtransune}

```
Transliteration environment: ugtranstsste

| begin{ugtranstsste} | dlt | shlmdivugrtt | silm 'ugrt | lend{ugtranstsste}
```

(12)

1.3 Samples

"('ugrt, ''Ugart')'s "ruins are often called **Ras Shamra** after the headland where they lie" – Wikipedia.

"The word (il) is used over five hundred times in the texts from Ugarit." – Robinson, 28

"The (šlmm) sacrifice, for example, appears to reflect a cultic meal in which the offerer partook of the same meal as was offered to the divinity." – OIN&N, 2002
